Taking Care of Papatūānuku

Organic Wealth supports businesses to improve their waste and recycling practises in order to save money and save the earth. We make it easy.

Our Waste Audit Report Service

The best way to understand the volume and type of waste you are generating, and how to effectively reduce it, is to carry out a hands-on waste audit. Our comprehensive waste audit report service sorts, weighs and analyses your waste to provide you with:

Financial Benefits

An analysis of your current waste to landfill and recycling costs and the potential savings that can be made per annum through improving your recycling practises.

Environmental Benefits

The potential volume of waste that could be diverted from the landfill per annum, showing the positive impact your business can have on the environment.

Waste Stream Data Analysis

Benchmark waste data displayed in easy to follow charts, that show the different types of waste your business generates and your current waste diversion rate.

Solutions

Expert advice and step by step recommendations that will help your business and staff to reduce, reuse and recycle.

Organic Wealth are a team of passionate people who are committed to diverting as much waste from the landfill as possible. We love to help people in business win environmentally and financially from taking care of our precious resources.

Save on Waste

Be Part of Our Success

We are noticing a growing trend of businesses who are committing to Zero Waste goals. Let us help your business to make a real difference.

Shopping Villages

We have supported shopping villages to reduce their waste to landfill volumes by over 50%. All retailers won both environmentally and financially.

Early Childcare Centres

We help many childcare centres to divert over 70% of their waste from landfill and reduce their organic waste volumes by up to 100%.

Elderly Care

We supported a local retirement village to save thousands of dollars in annual waste disposal costs.

Tertiary Institutions

We helped a local polytechnic to divert over 7.3 tonnes of waste from landfill per year and decrease their organic waste to landfill volumes by 77%.

Save on Waste

Additional Support Services

We often receive feedback from clients that our waste audit report is so comprehensive that they can easily implement the recommendations themselves. Alternatively there are some businesses who need extra support, so here are our additional support services that we can offer:

Bin Implementation Setup & Support. We ascertain what internal sorting bins and external collection bins you would require to effectively recycle the key waste streams. We organise good looking, clearly labelled bins and negotiate cost-effective pricing on your behalf with your waste contractors if required. We also provide wall posters and support the designated waste champion to set everything up.

Education & Inspiration Workshops

This is where we launch the Save on Waste programme and your commitment to sustainable workplace practises with the staff. We give them practical knowledge on what they need to do to make the programme successful, share with them some environmental facts and inspire them to want to do the right thing.

Monitoring and Support Visits

Your waste minimisation consultant comes to visit soon after the programme has been launched, to check the systems are working well, liaising with staff to answer questions and resolve any issues as they arise. Periodic visits help to embed the new recycling processes and ensure the behavioural change endures.

*We can tailor our additional services to suit individual needs.
Let's work together to restore nature's beauty.*
